## Company Overview

TV Guide, the essential companion and entertainment  
generations of television viewers, has grown up  
with the technology and entertainment industry.

With a head start  
in technology,  
we parlayed the  
same to enhance  
viewer information  
into a comprehensive  
entertainment  
experience.

Our three key services - Technology and content  
platforms and mobile and services - are combined

to provide the  
highest quality product  
experience and service.

Welcome to TV Guide

## A Gentle Approach to Chiropractic Care

### What Makes Me Different From Other Chiropractors?

Unlike traditional chiropractors I use a combination of techniques that are safe, gentle and use a light touch adjustment. One technique includes the use of the Activator instrument which delivers a safe, light, rapid impulse for correction of the spine.

This technique is so precise that it allows me to correct the problem with the spine if whether there is a missing vertebrae or misalignment with light adjustment. Not only will the pain and soreness go away, the problem will be corrected and there will be no further discomfort.

I combine direct therapies such as massage, muscle retraining, nutrition and nutrition so that each patient can reach their maximum level of health and well being.

*Not big peace with myself,  
the peace also big peace to other.*  
- Linda Kops

These days, it's true she walks into a bookstore or searches the internet, information can be found regarding how to find peace, wanting the peace, etc. But many times, she has a gradient sense to be missing from this wonderful information: we must allow the peace within ourselves. For it is an acceptance that this answer comes from person to person, but there is one central theme. We must learn how to get out of our own way and allow the healing that we desire to take place, as it is through healing that we can begin to feel peace within ourselves.
