Freestanding Double-sided Backlit Display

AURA™ is a great backlit solution for any environment.

Stable and stylish free-standing aluminum extrusion frame fits in perfectly with any existing display. Add one or multiple AURA™ standing lightboxes to 10x10, 10x20 or island trade show spaces. The AURA™ is perfect for permanent installations and portable enough for easy transport in trade show applications. The round sides of this vertical frame have a far more finished and purposeful shape than typical exposed frames. Universal appeal of the frame is eclipsed by the stunning double-sided backlit fabric graphics. The brilliance of Trifab dye-sublimated graphics is second to none. The deep saturation and expanded pigment range of this process and material combo brings your image to life. Backlighting from the AURA™ lightbox brings out the brilliant color and fine detail of your high-quality images. Photos, text and colorful design elements all benefit from dye-sublimated backlit Trifab graphics. The optional rigid graphic header can be printed with a full image on both sides. The header makes a great topper that enhances your message. Create remarkable displays within 10, 20, inlines or larger island displays.

Easy change-out of the fabric... so easy that you could have a new message every day of the show! SEG (silicon edge graphics) means message updates ship to your destination in an envelope.

### AURA™ 2472

- Frame
- Graphics(2)
- Sintra Header(double-sided) optional
- Kit Specs:
- Frame Size: 24" x 72"
